

Kotlin

- ⇒ It is a statically typed programming language, developed by JetBrains.
- ⇒ Since 2011.
- ⇒ It is the primary development language for android.
- ⇒ Extension *.kt.

* Hello world in Kotlin

```
fun main() {
    println("Hello Kotlin")
}
```

* Variables

⇒ There are two types of variables in Kotlin

→ Mutable variable

var name: String = "Nate"

→ Immutable variable

val name: String = "Nate"

{ Variable
name }

{ Variable
Type }
